The International Journal of ~~~

Proceedings of the Conference

<http://~~~Conference.Publisher-Site.com>

www.the~~~.com

www.~~~Conference.com

Dear Referee,

Thank you in advance for agreeing to referee the following paper for The International Journal of ~~~, the Proceedings of the Conference. We ask people who have been either in-person or virtual presenters at the conference, and who have submitted a paper for publication in the *Journal*, to referee up to three other papers for each submission they have made.

This is an important role. You belong to a community of educators and scholars who provide critical and constructive feedback on the work to their peers. Referees will be credited as Associate Editors for the volume of the *Journal* in which they have contributed (although, of course, the particular papers they refereed will not be identified). Guidelines on the role of the referee can be found on the following page.

Please find attached the two papers we are requesting you to referee. There is one file per paper, in Microsoft Word format. Each file commences with this letter, followed by the referee report and then the paper itself.

To referee these two papers, the process is as follows:

- Complete the referee information. This is for the publisher's use only. As the refereeing process is blind, your identity as a referee will remain confidential.
- Read the paper and complete the referee report form. If you are giving the paper a relatively high score, detailed comments are not necessary, although authors always appreciate comments and suggestions. If you give the paper a score below 75% on any criterion, however, it is important to the author that you explain the rationale for your score.
- Make annotations to the paper if you wish, using some method for clearly differentiating your text from the author's, such as block letters, a different coloured text or the 'changes tracking' function in Microsoft Word.
- Email this whole document back to me, including the scoring and other information you have added, before the DEADLINE FOR REFEREE REPORTS, "**DATE**" 2005.

Please don't hesitate to contact me by email if you have any questions about the refereeing process. I look forward to hearing from you.

Yours Sincerely,

Kathryn Otte

Publishing Manager, The International Journal of ~~~

kathryn@commongroundpublishing.com

The Role of the Referee

Please observe carefully the following guidelines on the role of the referee.

- 1. Expertise:** Papers are not always sent to a referee whose field is identical to the subject matter of that paper. You don't have to be precisely qualified in a field to be a constructive referee. In fact, quite the contrary, an excellent paper will speak beyond its narrowly defined field. If, however, a paper is so distant from your field that you do not feel qualified to judge its merits, please return it to the publishing manager for the journal, who will locate another referee.
- 2. Confidentiality:** Referees receive unpublished work, which must be treated as confidential until published. They should destroy all electronic and printed copies of the draft paper and referee report once they have received confirmation that their reports have been received by the publishing manager (in case we can't open the report files you send us). Referees must not disclose to others which papers they have refereed; nor are they to share those papers with any other person.
- 3. Conflict of Interest:** Referees must declare any conflict of interest or any other factor which may affect their independence—in cases for instance, where they have received a paper of a colleague or an intellectual opponent. In cases of conflict of interest, please notify the editorial team of your inability to referee a particular paper.
- 4. Intellectual Merit:** A paper must be judged on its intellectual merits alone. Personal criticism or criticism based solely on the political or social views of the referee, is not acceptable.
- 5. Full Explanation:** Critical or negative judgments must be fully supported by detailed reference to evidence from the paper under review or other relevant sources.
- 6. Plagiarism and Copyright:** If a referee considers that a paper may contain plagiarism or that it might breach another party's copyright, they should notify the editorial group for the journal, providing the relevant citations to support their claim.
- 7. Responsiveness:** Referees are asked to return their reports within two weeks. This assists us to provide rapid feedback to the author.

REFEREE'S REPORT

OVERALL RATING

Score each item out of on a range from zero to 10. For details of some of the issues involved in evaluating each item, see the COMMENTS section which commences on the next page. If your comments add up to a score of 75% or above and you have no further comments, it is sufficient to complete this page alone.

EVALUATION CRITERIA	SCORE
1. Significance of Themes	
2. Relevance of Themes	
3. Clarity of Thematic Focus	
4. Relationship to Literature	
5. Research Design and Data	
6. Data Analysis and Use of Data	
7. Use of Theory	
8. Critical Qualities	
9. Clarity of Conclusions	
10. Quality of Communication	
TOTAL SCORE % If some categories are not applicable in evaluating this particular paper, mark n.a. and calculate score as % average score across relevant items.	

RECOMMENDATION

On the basis of the above evaluation, my recommendation is as follows (mark with 'X'):

- ACCEPT
- ACCEPT WITH MINOR REVISIONS
- RESUBMIT WITH MAJOR REVISIONS
- REJECT

As a guide, the following are indicative score ranges:

- Accept (without qualification): 75-100%
- Accept with minor revisions: 60-75%
- Resubmit after major revisions: 40-60%
- Reject: Below 40%

SAMPLE FORM ONLY

SUBMISSION GUIDELINES

Papers should be approximately 2,000-5,000 words in length. They should be written as continuous expository narrative in a chapter or article style - not as lists of points or a PowerPoint presentation.

The papers are to be published in a fully refereed academic journal. This means that the style and structure of the text should be relatively formal. For instance, the paper should not be a verbatim transcript of an oral presentation, such as 'Today I want to speak to you about ...'.

Authors may use any referencing style they choose, as long as it is used consistently and to the appropriate standards. Spelling can vary according to national useage, but should be internally consistent. Papers should be thoroughly checked and proof-read before submission, both by the author and a critical editorial friend.

Papers are assessed by referees against ten criteria - or fewer if some criteria do not apply to a particular kind of paper.

REFEREE'S COMMENTS

If you have any detailed comments to make beyond the score on the previous page, please write them below.

Guidelines for comment: The scoring table on the previous page has been designed for quick comment. You don't need to comment in this section unless:

- you have given a low score in any of the evaluation criteria; or
- you believe you need to justify having given the paper a high score on any of the evaluation criteria; or
- you have indicated that a response to any of the evaluation criteria would be 'not applicable' because the paper legitimately does not set out to be proficient in that particular area (for instance, pure theory or philosophical argumentation which does not use conventional 'data'); or
- you have specific advice or comments you would like to provide the author(s) in relation to any of the evaluation criteria.

If any of the above applies, and particularly if you have recommended rejection or revision, then please elaborate:

SAMPLE FORM ONLY

1. Significance of Themes

- Is this a topic that needs addressing? Is the area investigated by the paper: timely? important? in need of addressing because it has been neglected? intrinsically interesting? filling a gap in current knowledge? (The paper does not have to be all of these things to be significant; it is sufficient to measure it against one of these forms of significance.)
- By addressing these themes, does this paper make a useful contribution? Is it itself significant?

REFEREE COMMENTS:

2. Relevance of Themes

- Are these themes relevant to this publication? If not, is there a more appropriate place for publication?

REFEREE COMMENTS:

3. Clarity of Thematic Focus

- Are the author's themes clearly stated?
- Does the paper follow through by addressing these themes, consistently and cogently?

REFEREE COMMENTS:

4. Relationship to Literature

- Does the paper demonstrate an adequate understanding of the current literature in the field?
- Does it connect with the literature in a way which might be useful to the development of our understanding in the area it addresses?

REFEREE COMMENTS:

5. Research Design and Data

- Has the intellectual work that is the basis for this paper been built on adequate evidence, informational input, or other intellectual raw materials?
- Has the research or equivalent intellectual work on which the paper is based been well designed?

REFEREE COMMENTS:

6. Data Analysis and Use of Data

- Has the interpretative potential of the data been realised?
- Has the data been used effectively to advance the themes that the paper sets out to address?

REFEREE COMMENTS:

7. Use of Theory

- Does the paper employ theory in meaningful way?
- Does it use theoretical concepts in such a way as to make plausible generalisations?

REFEREE COMMENTS:

8. Critical Qualities

- Does the paper demonstrate a critical self-awareness of the author's own perspectives and interests?
- Does it show awareness of the possibility of alternative or competing perspectives: such as other cultural, social, political, theoretical or intellectual perspectives?
- Does it show an awareness of the practical implications of the ideas it is advancing?

REFEREE COMMENTS:

9. Clarity of Conclusions

- Are the conclusions of the paper clearly stated?
- Cohesiveness of paper: do the conclusions adequately tie together the other elements of the paper (such as theory, data and critical perspectives)?

REFEREE COMMENTS:

10. Quality of Communication

- Does the paper clearly express its case, measured against the technical language of the field and the reading capacities of an academic, tertiary student and professional readership?
- What is the standard of the writing, including spelling and grammar? If you will be recommending publication with revisions, please make specific suggestions or list errors.

REFEREE COMMENTS:

Comments and critical suggestions on the content and structure of this referee format are most welcome. Please email <kathryn@commongroundpublishing.com>.
